Reflection

1. How did you arrive at your answers? (3-5 sentences)

What methods did you use for determining what type of blood spatter it is (ie: measured the splatter, compared it to other evidence, etc)?

2. How confident are you that you've analyzed the blood correctly? How can you increase your level of confidence when analyzing blood spatter patterns?

3. How can your analysis of blood spatters be used at a crime scene? List at least 3 ways.
