Diagnosing a Neurological Condition Through the Lens of History

Your challenge is to diagnose this patient through the lens of your assigned time period. You need to interview the patient and record as much information as possible about their condition on a medical intake form.

Your time period:

Expectations for the Handout We expect that you will approach the following requirements only through the lens of your time period	Quality of Work		
	Points Possible	Points Earned	Comments
The diagnosis			
Recommended treatment			
The technology available and how it works			
The understanding of the condition			
Key people from this time that added to the field of neuroscience (any kind of recognition that they may have received for their work)			
At least 3 references (1 non computer based)			
A visual timeline representing your time period			
Expectations for the Presentation			
Made good eye contact			
Spoke clearly and confidently			
Was knowledgeable about subject area			
Referred classmates to the handout			
Was engaging			
Individual self-evaluation including a completed rubric and 3 sentences reflecting on the research process and your role in developing the product/presentation			
Total			
Comments (3 sentences minimum):
