

True or False (for you)

\_\_\_ Your inner ear bones are the same size now as when you were born.

\_\_\_ If your eardrum ruptures when you have an ear infection, it can heal the hole itself.

\_\_\_ Apple is developing a volume control device for its iPods that would automatically calculate how long a person has been listening and at what volume, before gradually reducing the sound level, all in an effort to protect users' hearing.

\_\_\_ I ALWAYS wear ear protection at concerts.

\_\_\_ A noisy cafeteria at lunch time registers at about 80 decibels.

\_\_\_ Sustained noise levels of 80 decibels can cause long term hearing loss.
